ASTRELIGHTS INC

Description

Mini wall lights use the latest high-performance LED chips, which are high-brightness and low-energy consumption. They can be configured with automatic light-sensing functions that automatically turn off at sunrise or during the day, and automatically light up at sunset or at night, making them highly energy-efficient. The lamp body is composed of a die-cast aluminum ADC12 shell and a transparent lens, which is waterproof and will not seep water. A wide range of applications include stairwells, passageways and entryways in commercial and residential settings.
